

Project SATI DMP

PR event Bucharest February 20th 2018

Agenda

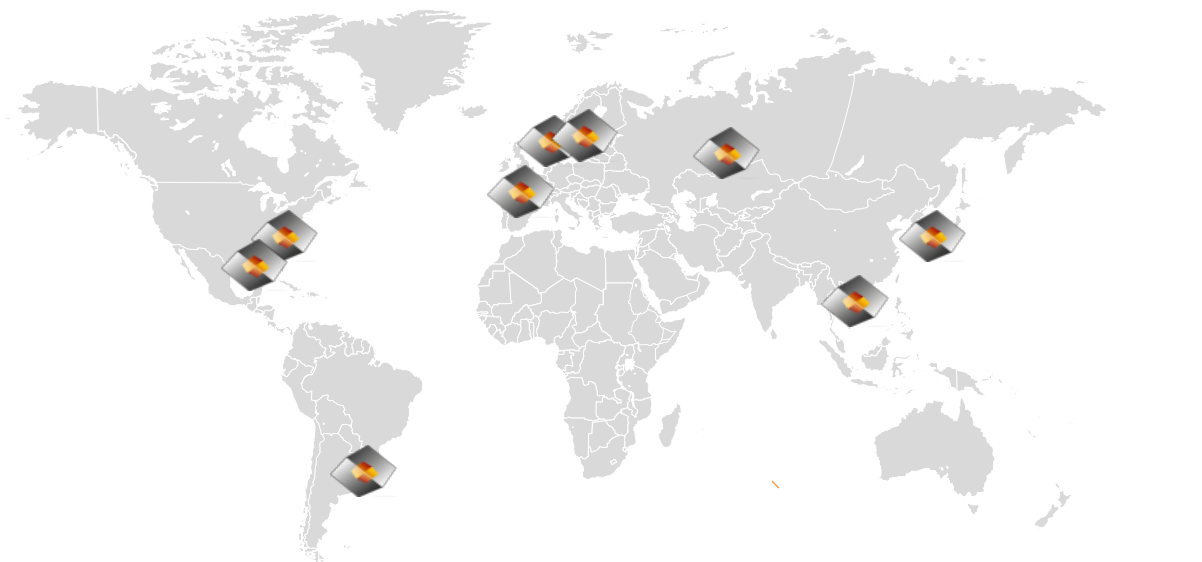

1. Overview of Cxense
2. The DMP Solution
3. Key learnings

1. Overview of Cxense

Cxense Vision

“To know better than anyone what people want and to enable our customers to use that insight to engage and monetize their audience.”

Cxense in Brief

 Cxense offices

Founded February 2010

Listed on Oslo stock exchange

Headquarters: Oslo, Norway

Global market presence: 4 regions - North America, LATAM, EMEA & JP

Software-as-a-Service subscription revenue model

Number of employees: 110

Number of sites managed: 7000 globally

Main verticals: Media and E-commerce

Number of customers 350

Growing customer base of our solutions

Cxense customers Q1'17

Consumer brands

Financial services

Sports

e-commerce and classifieds

Media
Publishers and Broadcasters

Time

Verticals

2. The DMP solution

Cxense DMP enables Publishers to utilize and monetize data

1 Unique user tracking & data integration

2 Rich user profiles & segmentation

User Profile

Cxense User ID: 13582808835611410522184
 External User ID: ABC1234

Desktop	139	90.25%
Tablet	8	5.19%
Mobile	7	4.54%

Gender: FEMALE
 Age: 31 YEARS

Top Interests

- Entertainment / Music
- Entertainment / Movies/Action
- Art / Photography
- Sports / Tennis
- Finance/ Trading and Investments
- Cars / Electric / Tesla
- Sports / Soccer / Barcelona
- Food / Vegetarian
- Travel / Asia / Singapore
- Home and Garden

Top Intent

- iphone 5s
- hotel berlin
- breaking bad
- playstation 4
- siemens washing machine
- action camera
- zara

Lookalike Modeling

Lookalike modeling lets you create a new segment consisting of users who behave similarly to the users in this segment. A common use case for a lookalike segment is to reach a broader audience with your targeted advertising campaigns.

Target size 0% 100% 12%
Current size 0% 100% 4%

Annotations
Annotations let you easily add additional data to segments in the form of key-value pairs. This can be data used to group similar segments together, make searching through a large list of segments easier, reference external identifiers, or similar.

Extend existing audience segments with similar users

LOOKALIKE MODELING

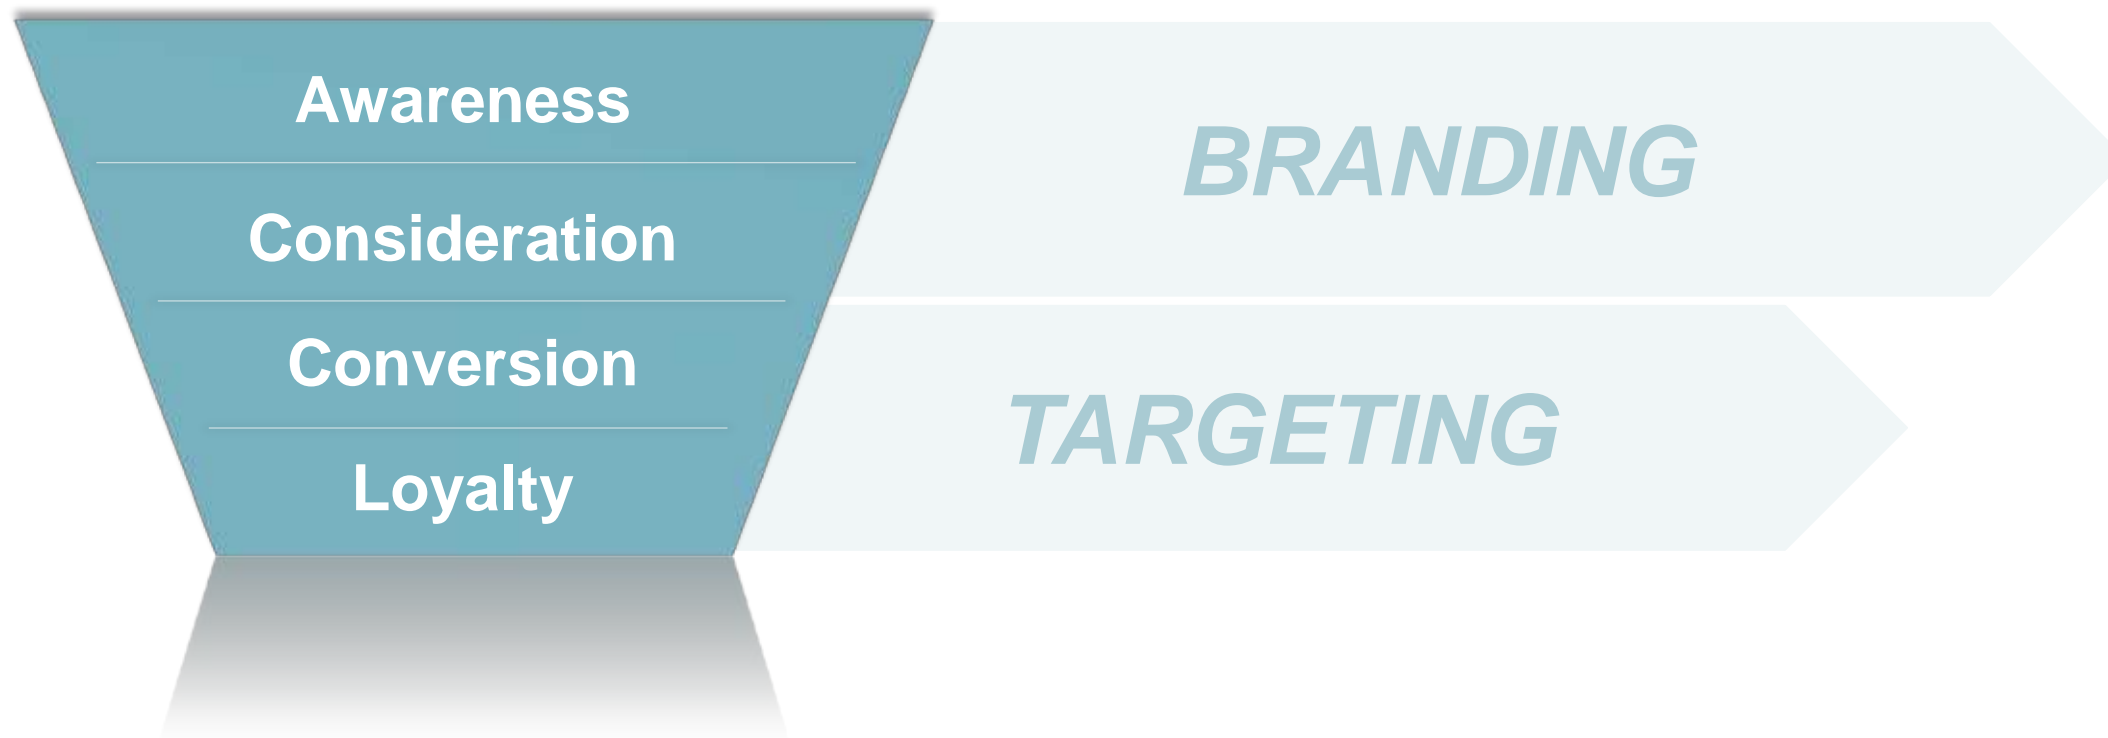

Key learnings

Three lessons learned that are important for all data management and personalization projects

- 1. Deploying data management and personalization technology is a journey for all organizations**
 - The technology works only as an enabler
 - Focus on change management
 - Ensure dedicated resources and defined roles
- 2. It is important to have big ambitions but to start with the “low hanging fruits”**
 - Complex does not necessarily mean increased commercial value/ROI
- 3. Working with (big) data is not a process of “making things perfect”**
 - Data driven decisions
 - Clear hypothesis and KPI's - trial and error is a natural part of the approach
 - Continuous improvements

Improved reach and accuracy allow Publishers to offer differentiated impressions for different segments...

...and can improve ROI for both Publishers and Advertisers

Example

- An advertiser wants to promote a product for women, with an impression goal of 1 million
- 10€ CPM without premium segments
- 13€ CPM with premium segments
- In your network male/female distribution is 55%/45%
- Women prediction accuracy for the premium segment is 75%

Without premium segment

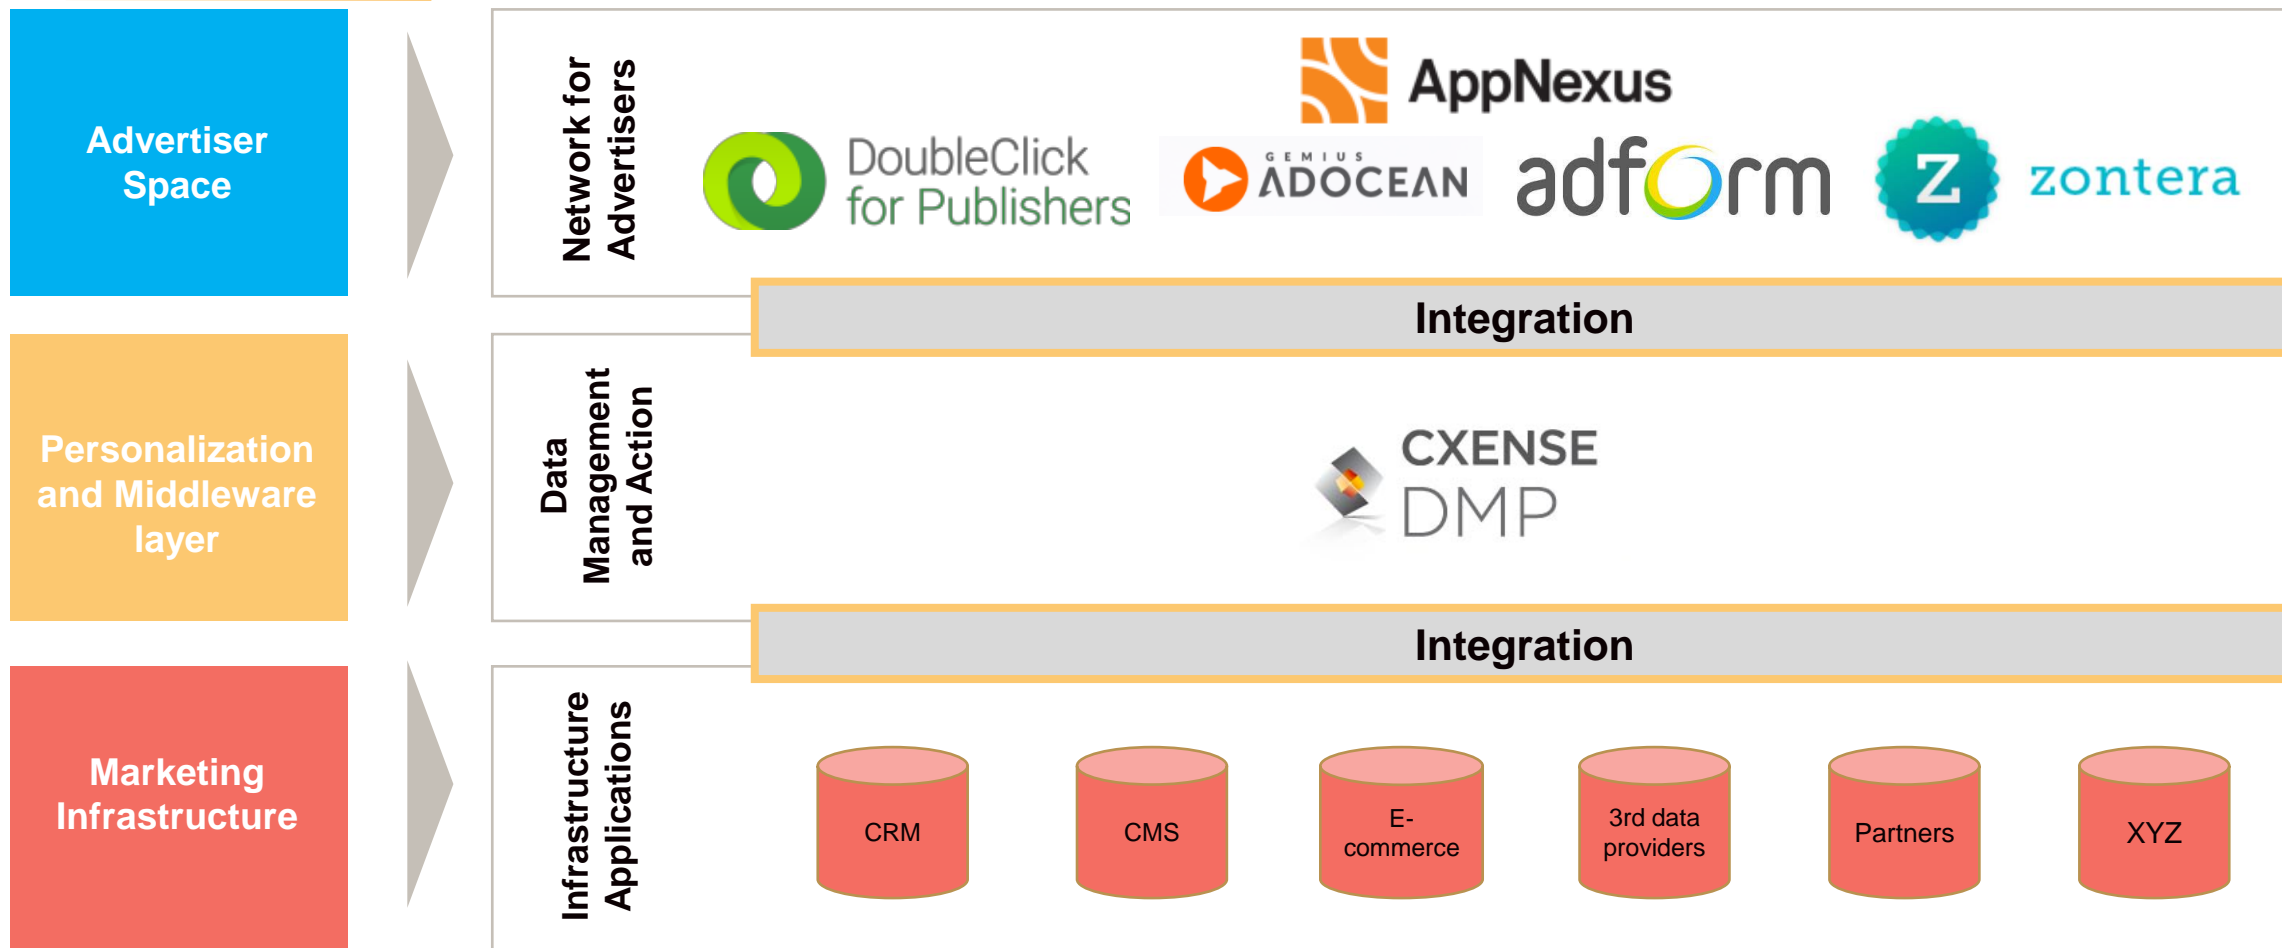

- Ad is shown to **450k women** and 550K men
- Publisher gets **10 000€**
- The advertiser's cost is **~22€ CPM** for reaching women (10/450*1000)

With premium segment

- Ad is shown to **750K women** (250K are misclassified)
- Publisher get **13 000€**
- The advertiser's cost is **~17€ CPM** for reaching women (13/750*1000)

Cxense DMP integrations

DMP trends

2010 → 2016 → 2017+

"the best data for your business is already at your fingertips ... or you probably know with whom you should be talking about data partnerships"

"delivering exceptional customer experiences starts by understanding one's own customers better, and 1st party data is the key to this"

"better than nothing, but that's about it"

"price & quality don't add up in 3rd party non-transparent segments"

Trends in DMP

L'Oréal CMO: "I'll pay more for quality"

"To avoid cheap impressions, L'Oréal's budgets are moving from open exchanges into private marketplaces", Bérubé said. **"In some markets, the advertiser is going directly to publishers to curate its own private marketplaces**, a shift reliant on first-party data from areas such as L'Oréal's limited e-commerce sales alongside data from publishers. Consequently, third-party data is becoming less important to the company's campaigns", Bérubé said.

Digiday UK Dec 2017

Thank you!
